Wayne Kirk Schmidt

AI and Machine Learning	
ML / AI Capabilities	Reasoning architecture design, adaptive workflow systems, low-latency ML inference, edge and federated deployment, retrieval-augmented generation (RAG), generative models (LLMs, GANs, VAEs), reinforcement learning
ML Frameworks	scikit-learn, XGBoost, LightGBM, TensorFlow, PyTorch
AI Application / Agent Frameworks	LangChain, LlamaIndex, smolagents
AI / Data Libraries	spaCy, NumPy, pandas
LLM Inference	vLLM, Ollama
Model Families	OpenAI GPT, Anthropic Claude, Google Gemini, Meta Llama, Qwen, SmolLM
AI Assistants / Platforms	Microsoft Copilot, Atlassian Rovo
Model Hub	Hugging Face (model pulling and deployment)
Vector Stores / Search	Qdrant, Chroma, pgvector

Cybersecurity and Identity	
Security Analytics / Monitoring	Splunk, Sumo Logic, Wazuh, Security Onion, Elastic Stack (ELK)
Endpoint Management / Security	Tanium, CrowdStrike
Identity / Access Management	Auth0, Kerberos, TACACS, RADIUS
Threat Intelligence	Recorded Future
Network Security Monitoring	Zeek, Snort, Suricata
Host Security / Integrity	Tripwire, AppArmor
Threat Frameworks / Standards	MITRE ATT&CK, MITRE D3FEND, STIX/TAXII
Firewall Technologies	Check Point, Palo Alto, iptables
Static Security Analysis	Bandit, CodeQL
DAST / Fuzzing	Nikto
Penetration Testing / Recon	Kali Linux, Metasploit, Nmap, Shodan

Cloud and Platform Engineering	
Cloud / Application Platforms	AWS, Azure, GCP, OpenStack
Containers / Orchestration	Kubernetes (K8s), K3s, Docker, Podman
System Build / Administration	Ansible, Terraform, Packer, Puppet, Chef
Operating Systems	Linux, Windows, macOS
Virtualization	VMware ESXi, VMware Workstation, Hyper-V, VirtualBox
Servers / Edge Hardware	Enterprise server infrastructure (HP, Dell), IoT, single-board computers (SBCs)
Storage Products / Protocols	Veritas, Hitachi SAN, NetApp NAS, Samba, NFS
CMDB / Asset Modeling	ServiceNow, NetBox, i-doit, CMDBuild
Workflow / Security Automation	n8n, Shuffle, Power Automate

Wayne Kirk Schmidt

Software Engineering and Delivery	
Programming / Scripting	Python, PowerShell, Bash / Shell
Additional Language Experience	Java (maintenance and security), JavaScript; other languages on request
Development Frameworks	Spring
Development Tools / IDEs	Visual Studio, IntelliJ, Xcode, Eclipse
Source / Artifact Control	Git, SVN, Artifactory, Bitbucket
CI / CD	Jenkins, GitHub Actions, GitLab CI
Testing Tools	Selenium, TestRail
Linting / Code Quality	Flake8, Ruff
Delivery Strategies	Agile, Scrum, Kanban, Waterfall, iterative delivery, TDD, pair programming, continuous integration

Data and Observability	
Messaging / Event Platforms	Kafka, RabbitMQ, MQ
Relational Databases	PostgreSQL, MySQL, Oracle, Microsoft SQL Server
Data Analysis Platforms	Jupyter Notebooks, Spark
Data Collection / Correlation	Logstash, Beats
Telemetry / Tracing / Metrics	Fluent Bit, Jaeger, Prometheus
Visualization	Matplotlib, Plotly, Dash, Power BI
System Monitoring	Grafana, Nagios, Geneos, Hawk
Instrumentation	eBPF

Networks and Capital Markets	
Network Equipment	Arista, Cisco switching platforms, F5, Palo Alto
Network Protocols	BGP, OSPF, IGMP, SNMP v1-3
Network Management	RANCID
Network Analysis / Probes	NETSCOUT, Corvil, Wireshark, self-built probes
Time Sync Products / Protocols	Meinberg Devices, PTP, NTP, GPS devices
Network / Directory Services	DNS, DHCP, Active Directory
Market Data Platforms	TIBCO Rendezvous, NYSE DFD, Activ, RMDS (P2PS, MDH, DACS), Bloomberg

Architecture and Governance	
Architecture Frameworks	Zachman, PEAF
Governance / Risk	NIST SP 800 series, NIST AI RMF, ISO/IEC 27000 series, ISO/IEC 42001, ISO 31000, COBIT, COSO, SOX
Service / Operations Management	ITIL, ITOM, ITSM, ITOA
Ticketing Systems	Jira, ServiceNow
Collaboration / Productivity	Confluence, SharePoint, Microsoft Office
