

WAYNE KIRK SCHMIDT

PRINCIPAL TECHNOLOGIST | CAPABILITY ENGINEER | TECHNOLOGY LEADER

OBJECTIVE

Seeking senior technology leadership or principal-level engineering engagements that combine strategy, architecture, and hands-on delivery to build secure, resilient AI and platform capabilities, modernize complex environments, and strengthen the teams that own them. Based in Boston and open to full-time, fractional, advisory, and consulting engagements.

PROFILE

Principal technology and engineering leader with decades of experience designing, building, modernizing, and operating mission-critical systems across financial services, technology, and regulated environments.

Combines executive ownership with hands-on depth in enterprise architecture, distributed systems, platform engineering, cybersecurity, observability, automation, and production AI.

Career spans Salomon Brothers, Morgan Stanley, Nomura, Tanium, and Sumo Logic, with capital-markets experience across fixed income, derivatives, foreign exchange, government bonds, equities, quantitative analysis, market data, and high-volume trading. Additional experience includes insurance, automotive, semiconductor manufacturing, and security technology.

Built and led Tier-0 engineering and operations teams across the Americas and Asia-Pacific.

Draws on perspectives gained as a founder, inventor, advisor, forward-deployed technologist, and product builder to move quickly and confidently from diagnosis and design through implementation, operationalization, and capability transfer.

Penchant for turning difficult business and technical problems into secure, scalable platforms and leaving the teams that own them with stronger capability, clearer governance, and greater confidence.

CORE CAPABILITIES

Technology Strategy • Enterprise Architecture • Production AI Systems • AI Orchestration and Governance • LLM Applications and RAG • Platform Engineering • Distributed and Event-Driven Systems • Cloud and Hybrid Platforms • DevSecOps • Cybersecurity and Operational Resilience • Observability • Automation • Data Platforms • Capital Markets Technology

SELECTED CAREER OUTCOMES

- Delivered **\$300M+** in documented business value through trading profits, platform revenue, cost reduction, operational efficiency, and technology transformation across the Americas and Asia-Pacific.
- Built and led Nomura's APAC Market Data technology group, growing from 3 to **34 people**, comprising 24 regional operations and 10 global engineering staff, with accountability for a **\$107M** portfolio spanning **7** markets and **15** global vendors.
- Invented **Production Perimeter**®, a [patented](#) ML-based security platform deployed globally across **60,000+** hosts, blocking unwanted test trades from entering live exchanges. The intellectual property was subsequently acquired by Illumio.
- Built **ARK**®, an ML-driven dependency-intelligence platform supporting a global estate of **60,000+** hosts, reducing deployment risk by **97%** and increasing release velocity by **17×**.
- Invented and delivered **NXT RAW**®, an ML-driven market data platform achieving sub-**0.25** microsecond latency and generating **\$14M+** in revenue across multiple APAC markets.
- Built **PULSE**®, a Kafka-based event processing platform handling **1.5 million** events per minute and reducing operational response time from **20 minutes** to **10 seconds**.
- Built **BEACON**®, an ML-driven threat detection platform that reduced the time required to identify compromises by **97%** across enterprise endpoint environments.

PROFESSIONAL EXPERIENCE

ChangelS | Founder & Principal Technologist

Boston, Massachusetts / Tokyo, Japan | 2013 – Present

- Delivered enterprise-wide AI workflows for IT Operations and Human Resources at a LATAM bank, reducing incident and problem management reporting from **two weeks** to **five minutes** and employee review preparation from **three weeks** to **three hours**.
- Developed AI governance frameworks and engineering guidelines for a U.S. financial services firm.
- Deployed an ML-driven log analysis platform, reducing issue triage effort by **85%** and MTTR by **3x**.
- Built an ML-driven asset platform for a global insurance firm, raising accuracy to **99.9%** and reducing reporting lag by **99.93%**.
- Created a Kafka platform processing **1.5 million** events per minute, reducing response time from **20 minutes** to **10 seconds**.

Insight Innovation Fund | Head of Product (Fractional / NED)

Tokyo, Japan | 2024 – Present

- Patented **MORPHOS/9STACK®**, a reasoning-based AI orchestration architecture for secure, private, adaptive enterprise AI.
- Directed product architecture and enterprise AI solutions, advising on go-to-market, partnerships, and M&A strategy.

Sumo Logic Japan, K.K. | Senior Solution Engineer

Tokyo, Japan | 2018 – 2022

- Built **10+** security, observability, and DevOps vendor integrations, expanding platform addressability for enterprise clients.
- Developed automated monitoring tooling reducing deployment time by **82%**, adopted as the APAC reference tooling.
- Authored **40+** client solutions across DevOps and observability, supporting renewals and expansion revenue in Japan.

Tanium G.K. | Executive Director – Technical Account Management

Tokyo, Japan | 2015 – 2016

- Created **BEACON®**, an ML-driven compromise threat detection system, reducing compromise identification time by **97%**.
- Built **BRAVO®**, an ML-driven testing framework saving an estimated **\$1.8M** in engineering effort.
- Architected Compliance Reporting for **1,000+** Fuji Xerox printers via Tanium, shortening audit/reporting from weeks to days.

Smart Technology Partners | Chief Technology Officer (Fractional)

Japan | 2013 – 2016

- Designed a green energy cloud architecture using refurbished hardware, delivering sustainable infrastructure for 10+ clients.
- Delivered Digital Transformation proposals for regional government clients across Fukushima and Kumamoto prefectures.
- Developed cloud solutions across logistics, genetic data processing, and data center security.

Nomura Securities | Executive Director – Asia Head of Market Data / Global Head of Market Data Engineering

Tokyo, Japan | 2009 – 2013

- Delivered **NXT RAW**, a ¼ µs ML-driven TSE data platform generating **\$14M+** in revenue.
- Managed a **\$107M** portfolio spanning **7 APAC** markets, leading a **34-person** team and managing **15 global vendors** supporting Trading and Retail.
- Built a DevOps automation framework reducing engineering effort by **70%** across a **\$25M** project portfolio.

Morgan Stanley Securities Japan | Vice President – Infrastructure Architect, Asia-Pacific

Tokyo, Japan | 2003 – 2009

- Built **ARK®**, an ML-driven dependency-intelligence platform supporting a global estate for operations and changes.
- Invented **Production Perimeter®**, a [patented](#) ML-based security platform.
- Grew the infrastructure development team from 3 to **12 engineers** across APAC, in addition to a global deployment team.

Morgan Stanley | Vice President – Perimeter Security Engineering

New York, New York | 1998 – 2003

- Built **AEGIS**, cross-platform security and configuration management across 80+ institutional trading locations.
- Built **ARGUS**, a firewall lifecycle automation suite coordinating global plant builds and reducing misconfiguration risk.
- Led the firm's Y2K global security infrastructure refresh, replacing at-risk legacy systems across global operations.

EARLY CAREER: BOSTON & NEW YORK

Systems and Infrastructure roles building technical foundations in networking, distributed systems, and enterprise platforms:

Salomon Brothers: Fixed Income, Forex, and Derivatives Technology: Four years supporting fixed-income and derivatives trading and quantitative risk workloads; reduced risk-calculation time **15x** and delivered **\$1.3M** in procurement savings.

Pencom (Collective Technologies): Architected a Tivoli-based software-deployment platform for a 5,000-laptop fleet.

Wildfire Communications: Led a four-person systems-administration team and automated Windows NT provisioning from seven hours to twenty minutes.

GTE Internetworking Systems: Automated provisioning across 500+ servers, improving restore performance 20x.

SELECTED TECHNICAL SKILLS

- **Languages and Automation:** Python, Bash, PowerShell, Java, Ansible, Terraform, Jenkins, GitHub Actions, GitLab CI
- **Cloud, Containers, and Infrastructure:** AWS, Azure, GCP, Kubernetes, Docker, VMware, OpenStack
- **Network Infrastructure and Tools:** Cisco, Arista, PTP, NTP, Corvil
- **AI and ML Libraries, Runtimes, and Models:** OpenAI GPT, Anthropic Claude, Google Gemini, Atlassian Rovo, Meta Llama, Microsoft Copilot, scikit-learn, XGBoost, LightGBM, TensorFlow, PyTorch, LangChain, LlamaIndex, vLLM, Ollama, Hugging Face
- **Data, Messaging and Integration:** Kafka, RabbitMQ, PostgreSQL, Redis, Qdrant, Chroma, pgvector, Pandas, Power BI, REST APIs
- **Security Technologies:** Tanium, CrowdStrike, Auth0, Recorded Future, Zeek, eBPF, Check Point, Palo Alto
- **Security, Risk, and Compliance:** MITRE ATT&CK, NIST SP 800 series, ISO/IEC 27000 series, ISO 31000, COBIT, SOX
- **Observability Technologies:** OpenTelemetry, Splunk, Sumo Logic, Elastic Stack, Grafana, Prometheus
- **Capital Markets Platforms:** NYSE DFD, Activ, RMDS P2PS, MDH, DACS, Bloomberg, TIBCO Rendezvous
- **Delivery Methods:** Agile, Scrum, Scaled Agile Framework (SAFe), Kanban, Extreme Programming (XP), Waterfall

Additional Technical Skills: waynekirkschmidt.me/technical

EDUCATION & LANGUAGES

Ohio State University: B.S. Physics (*dual study: Physics & Fine Arts*)

Adjunct Professor, Continuing Education: New York University – created coursework and taught

- Advanced Perl Programming
- Introduction to Networking
- Introduction to Security

English: Native **Japanese:** Professional working proficiency · JLPT N3 · N2 in progress
