WAYNE KIRK SCHMIDT

PRINCIPAL ARCHITECT | ENGINEERING LEADER | AI • Cybersecurity • Platforms

PROFILE

Principal architect and engineering leader with extensive financial-services experience, combining technology strategy with hands-on delivery across AI, cybersecurity, and enterprise platforms. Designs, builds, modernizes, and operates mission-critical systems, improving performance, security, reliability, and delivery speed.

Career spans Salomon Brothers, Morgan Stanley, Nomura, Tanium, Sumo Logic, and ChangeIS across enterprise technology and regulated environments. Leaders familiar with his work recruited him to Morgan Stanley, Nomura, Tanium, and Sumo Logic, including the same country manager at both Tanium and Sumo Logic.

Built and led engineering and operations teams across the Americas and Asia-Pacific, combining organizational leadership with technical depth in distributed systems, automation, and production operations.

Founder, inventor, advisor, and product builder who guides solutions from concept through deployment and production stabilization, mentoring teams to operate and evolve them sustainably. Turns complex business and technical problems into reusable capabilities with lasting operational ownership.

CORE CAPABILITIES

Technology Strategy • Enterprise Architecture • Applied AI and Governance • Platform Engineering • Cybersecurity and Resilience • Distributed Systems • Observability and Automation • Capital Markets Technology

SELECTED CAREER OUTCOMES

- **PULSE (2024):** Built an ML platform processing **1.5M events/minute**, cutting notification time from **20+ minutes** to **10 seconds**; guided eight engineers through deployment, production stabilization, and handoff to a 15-person operations team.
- **LATAM bank (2024 – Q1 2026):** Built multiple AI workflows cutting incident reporting from **two weeks to five minutes** and review preparation from **three weeks to three hours**; guided nine bank and vendor team members through deployment, stabilization, and client handoff.
- Delivered **$126M** in cumulative multi-year savings at Nomura through circuit, vendor, and hardware consolidation, improving latency, capacity, and stability.
- Grew and led Nomura's Market Data APAC operations and Global Engineering group from 3 to **34 people**, overseeing a **$107M** portfolio across **7 APAC** markets and **15 global vendors**.
- Invented **Production Perimeter**, a patented security platform deployed across 60,000+ hosts, preventing an estimated **$473M** in potential trading losses; its intellectual property was acquired by Illumio.
- Designed and delivered **ARK dependency intelligence** supporting **tens of thousands of APAC servers**, reducing migration deployment risk **by 97%** and increasing release velocity during data center migrations **by 17×**.
- Designed and led delivery of **NXT RAW**, an ML-assisted hardware trading platform, cutting latency from **2–3 milliseconds** to under **¼ microsecond** and generating **$14M+** in revenue.
- Built and led production delivery of **BEACON**, reducing time to identify system compromise and lateral movement by **97%**.

PROFESSIONAL EXPERIENCE

ChangeIS | Founder & Principal Architect
Boston, Massachusetts / Tokyo, Japan | *2013 – Present*

Independent architecture, engineering, and advisory practice delivering AI, cybersecurity, and platform capabilities from concept through production and client handoff. Maintained alongside employment at Tanium and Sumo Logic.

- Built AI workflows for a LATAM bank, converting a multiyear incident backlog into annotated, searchable records in Confluence and Power BI.
- Built an ML-assisted operations stack coordinating on-premises compute and AI workloads for a U.S. financial services firm.
- Deployed ML log analysis, cutting triage effort by **85%** and mean time to resolution by **two-thirds**.
- Built an ML asset platform for a global insurer, raising accuracy to **99.9%** and reducing report lag by **99.93%**.
- Built PULSE (2024); guided engineers across the U.S. and India through packaging, integration, deployment, production stabilization, and operations handoff.

Insight Innovation Fund | Non-Executive Director & Head of Product (Fractional)
Tokyo, Japan | *2024 – Present*

- Invented and prototyped **MORPHOS/9STACK**, a patented AI orchestration architecture for secure, private, adaptive enterprise AI.
- Directed product architecture and enterprise AI solutions; advised on go-to-market, partnerships, and M&A strategy.

Sumo Logic Japan, K.K. | Senior Solution Engineer
Tokyo, Japan | *2018 – 2022*

- Built open-source tooling analyzing usage and configuration of observability platforms, such as Splunk, to inform client planning.
- Created **10+** security, observability, and DevOps vendor integrations, expanding support for enterprise environments.
- Delivered **40+** client solutions across DevOps and observability, supporting renewals and expansion revenue in Japan.

Tanium G.K. | Executive Director – Technical Account Management
Tokyo, Japan | *2015 – 2016*

- Built **BEACON** to detect compromise and lateral movement, then guided a two-person team to make it production ready.
- Developed **BRAVO**, an ML-driven testing framework saving an estimated **$1.8M** in engineering effort.
- Architected compliance reporting for **1,000+** Fuji Xerox printers via Tanium, shortening audit/reporting cycles from weeks to days.

Smart Technology Partners | Chief Technology Officer (Fractional)
Japan | *2013 – 2016*

- Designed cloud infrastructure using refurbished hardware for **10+** government and commercial clients, extending hardware life and reducing procurement costs.
- Built solutions for logistics, genetic-data processing, and data-center security, including camera-based recognition systems.

Nomura Securities | Executive Director – Asia Head of Market Data / Global Head of Market Data Engineering
Tokyo, Japan | *2009 – 2013*

- Led APAC market-data operations and global market-data engineering supporting Trading and Retail, directing platform strategy, vendor management, and infrastructure modernization.
- Designed and prototyped **NXT RAW**, guiding development, deployment, and adoption across **APAC** trading environments.
- Developed a DevOps automation framework, reducing engineering effort by **70%** across a **$25M** project portfolio.

Morgan Stanley Securities Japan | Vice President – Infrastructure Architect, Asia-Pacific
Tokyo, Japan | *2003 – 2009*

- Designed and prototyped **ARK** dependency intelligence, guiding development and adoption for infrastructure changes.
- Invented **Production Perimeter** and led its engineering delivery and global deployment to protect live trading environments.
- Grew APAC infrastructure development team from 3 to **12 engineers** and guided a global deployment team.

Morgan Stanley | Vice President – Perimeter Security Engineering
New York, New York | *1998 – 2003*

- Designed **AEGIS**, a cross-platform security and configuration management platform supporting 80+ global institutional locations.
- Developed **ARGUS** firewall automation, coordinating global infrastructure deployments and reducing misconfiguration risk.
- Led the firm's global Y2K security infrastructure refresh, replacing at-risk legacy systems across global operations.

EARLY CAREER: BOSTON & NEW YORK

Systems and infrastructure roles establishing foundations in networking, distributed systems, and enterprise platforms.

Salomon Brothers (Fixed Income, FX & Derivatives Technology): Supported trading and quantitative risk systems; reduced risk-calculation time **15×** and delivered **$1.3M** in procurement savings.

Pencom (Collective Technologies): Architected Tivoli-based software deployment for a **5,000-laptop** fleet.

Wildfire Communications: Led four systems administrators and automated Windows NT provisioning, reducing setup time from **seven hours** to **twenty minutes**.

GTE Internetworking Systems: Automated provisioning across **500+ servers** and improved restore performance **20×**.

SELECTED TECHNICAL SKILLS

- **AI & ML:** OpenAI GPT, Anthropic Claude, Google Gemini, Microsoft Copilot, Atlassian Rovo, RAG, scikit-learn, PyTorch, LangChain, LlamaIndex, vLLM, Ollama, Qdrant.
- **Cybersecurity:** Tanium, CrowdStrike, Auth0, Zeek, CodeQL, MITRE ATT&CK.
- **Cloud & Platforms:** AWS, Azure, GCP, Linux, Kubernetes, Docker, Podman.
- **DevOps & Automation:** Python, PowerShell, Bash/sh, Ansible, Terraform, GitHub Actions, GitLab CI.
- **Data & Observability:** Kafka, Spark, PostgreSQL, Oracle, Microsoft SQL Server, Power BI, Fluent Bit, Jaeger, Prometheus, Grafana, ELK stack, Splunk, Sumo Logic.
- **Architecture & Governance:** Zachman, PEAF, ITIL, NIST, NIST AI RMF, ISO/IEC 27000, ISO/IEC 42001, ISO 31000, COBIT.
- **IT Management Platforms:** ServiceNow, NetBox, i-doit, Ralph, SolarWinds Orion.
- **Delivery Methods:** Agile, Scrum, Kanban, SAFe, Waterfall.
- **Capital Markets Platforms:** NYSE DFD, Activ, RMDS P2PS, MDH, DACS, Bloomberg, TIBCO Rendezvous.

Additional Technical Skills: waynekirkschmidt.me/skilllist

EDUCATION & LANGUAGES

Ohio State University: B.S. Physics *(additional study in Fine Arts)*

Adjunct Professor, Continuing Education: New York University – created coursework and taught
- Advanced Perl Programming
- Introduction to Networking
- Introduction to Security

English: Native
Japanese: Professional working proficiency · JLPT N3 certified · studying toward N2
